

Name: _____

Date: _____

Multiplying Fractions 2

Multiply the following fractions. Reduce all of your answers to lowest terms.

$$\textcircled{1} \quad \frac{3}{4} \times \frac{1}{2} =$$

$$\textcircled{2} \quad \frac{9}{10} \times \frac{5}{7} =$$

$$\textcircled{3} \quad \frac{5}{7} \times \frac{8}{10} =$$

$$\textcircled{4} \quad \frac{1}{3} \times \frac{6}{11} =$$

$$\textcircled{5} \quad \frac{2}{3} \times \frac{2}{4} =$$

$$\textcircled{6} \quad \frac{5}{12} \times \frac{1}{3} =$$

$$\textcircled{7} \quad \frac{4}{11} \times \frac{2}{5} =$$

$$\textcircled{8} \quad \frac{1}{6} \times \frac{4}{7} =$$

$$\textcircled{9} \quad \frac{7}{9} \times \frac{2}{3} =$$

$$\textcircled{10} \quad \frac{7}{8} \times \frac{3}{7} =$$

$$\textcircled{11} \quad \frac{6}{10} \times \frac{3}{8} =$$

$$\textcircled{12} \quad \frac{8}{9} \times \frac{1}{5} =$$

$$\textcircled{13} \quad \frac{3}{6} \times \frac{5}{12} =$$

$$\textcircled{14} \quad \frac{1}{5} \times \frac{7}{12} =$$

$$\textcircled{15} \quad \frac{2}{8} \times \frac{3}{9} =$$

$$\textcircled{16} \quad \frac{1}{2} \times \frac{3}{6} =$$

$$\textcircled{17} \quad \frac{1}{4} \times \frac{6}{7} =$$

$$\textcircled{18} \quad \frac{2}{10} \times \frac{9}{11} =$$

$$\textcircled{19} \quad \frac{1}{8} \times \frac{2}{6} =$$

$$\textcircled{20} \quad \frac{2}{4} \times \frac{1}{6} =$$
