

Name: _____

Date: _____

Multiplying Fractions 3

Multiply the following fractions. Remember to reduce all of your answers to lowest terms.

$$\textcircled{1} \quad \frac{6}{13} \times \frac{2}{6} =$$

$$\textcircled{2} \quad \frac{7}{11} \times \frac{6}{10} =$$

$$\textcircled{3} \quad \frac{4}{8} \times \frac{1}{6} =$$

$$\textcircled{4} \quad \frac{11}{14} \times \frac{9}{13} =$$

$$\textcircled{5} \quad \frac{7}{8} \times \frac{2}{11} =$$

$$\textcircled{6} \quad \frac{5}{12} \times \frac{1}{2} =$$

$$\textcircled{7} \quad \frac{6}{7} \times \frac{4}{8} =$$

$$\textcircled{8} \quad \frac{3}{5} \times \frac{3}{4} =$$

$$\textcircled{9} \quad \frac{1}{4} \times \frac{6}{9} =$$

$$\textcircled{10} \quad \frac{1}{15} \times \frac{6}{11} =$$

$$\textcircled{11} \quad \frac{4}{5} \times \frac{12}{14} =$$

$$\textcircled{12} \quad \frac{4}{7} \times \frac{7}{11} =$$

$$\textcircled{13} \quad \frac{10}{11} \times \frac{5}{14} =$$

$$\textcircled{14} \quad \frac{2}{4} \times \frac{1}{5} =$$

$$\textcircled{15} \quad \frac{1}{2} \times \frac{4}{6} =$$

$$\textcircled{16} \quad \frac{2}{3} \times \frac{2}{5} =$$

$$\textcircled{17} \quad \frac{3}{11} \times \frac{6}{14} =$$

$$\textcircled{18} \quad \frac{6}{12} \times \frac{7}{8} =$$

$$\textcircled{19} \quad \frac{4}{9} \times \frac{8}{10} =$$

$$\textcircled{20} \quad \frac{3}{4} \times \frac{8}{11} =$$
